## 0.1 Question 2d

If we were to drop businesses with postal code values equal to `missing_postal_code`, what specific types of businesses would we be excluding? In other words, is there a commonality among businesses with missing postal codes?

**Hint:** You may want to identify and Google the names of the businesses with missing postal codes. Feel free to reuse parts of your code from 2c to re-examine `bus_missing`, but we will not be grading your code.

If “OTG” is an abbreviation for “Off The Grid” then a large part of missing postal codes are associated with “Off The Grid” location. “Off The Grid” is a location in SF for food trucks and pop-ups. If we were to drop businesses with missing postal code we could potentially be excluding mobile or temporary setups like food trucks and pop-ups.
